---

## PROFESSIONAL PROFILE

---

Solution-oriented software developer with hands-on experience in C#, API development, and cloud-based technologies. Background from Volvo Trucks and Powertrain, including development, debugging, documentation, and testing. Communicative team player with a strong interest in infrastructure, Azure, and automation.

---

## EXPERIENCE

---

### Thesis Project: Parameter Database

*Volvo Trucks, Gothenburg*

**May 2023 – Jun 2023**

- Built a parameter database with a React frontend, Node.js/Express backend, and MySQL database.
- Implemented API, Excel import/export, and advanced table customisation.
- Adopted internally as a foundation for continued development.

### System Development Intern

*Volvo Powertrain, Gothenburg*

**Nov 2022 – Jun 2023**

- Contributed in a C# development team within an agile environment.
- Worked with database handling, integrations, testing, and documentation.
- Gained valuable experience from international collaboration and complex IT systems.

### Teacher Assistant & After-school Educator

*Vidhögeskolan, Veddige*

**Nov 2023 – Present**

- Supporting students and maintaining a structured, positive learning environment.

### Part-time Warehouse & Retail Employee

*Gekås Ullared AB, Ullared*

**Oct 2017 – Nov 2023**

- Customer service, picking, and logistics in a high-volume retail environment.
-

## EDUCATION

---

### **AI 1 (in progress)**

*Remote studies, 2024*

- Introductory course in artificial intelligence and future technologies.

### **Technical Program – Information and Media Technology**

*Peder Skrivares School, Varberg*

**Aug 2017 – Jun 2020**

---

## TECHNICAL SKILLS
